TGL Onshore & Offshore rentals:

World energy consumption presents significant challenges & major expenses to the oil & gas companies throughout the World today. The exploration of oil and gas and even the new developments in the wind energy sector demand efficient logistics both onshore & offshore. Companies in particular no longer want to purchase equipment; they prefer to "rent where & whenever possible in the market today".

TGL fabricate baskets & containers associated with the Oil & Gas Industries; safety comes first for all our manufacturing. TGL uses only Qualified welders following World Wide procedures & International Standards, all materials used in the manufacturing processes are fully traceable & each unit comes with "all relevant certification & it's own MDR booklet". Testing of the various units can be conducted locally by reputable third party certification companies like Germanischer Lloys or Bureau Veritas (Thailand) Ltd.

TGL is more than capable when it comes to the design & manufacture of your custom projects for both onshore & offshore. Our engineers "can & will" work closely with you at all times to make sure that your project runs smoothly on time each time.

Please look to the following pages for just some of our rentals & other services we can offer to you including Environment solutions.

Containers manufactured in various sizes & customer specifications:

Our onshore & offshore baskets all supplied with 3rd party certification & NDT, all units Load tested & issued with MDR Booklets for traceability.

3,000 liter stainless steel tote tanks complete with load test certificate, 4 legged sling & shackles plus complete MDR book for each individual tank.

Stainless Steel Tote Tanks.

These Tanks were specifically designed & built to Chevron Standards for toughness & durability, inside we have filter fitted to the outlet & baffle to avoid too much movement of the interior liquid. Outlet tap is sunk into the tank to avoid unwanted collisions with other equipment. Triple site glass to always maintain visual levels. These tanks come with complete MDR's, slings & shackles & load test certification.

Environmental Equipment Services:

Air Compressor (Rig Safe)

Specifications

- Model: Denyo
- 390 CFM
- C/W Crash Frame
- Complete with 4
 legged Wire Rope
 Sling & Shackels
 c/w Certificates
- Proof Load Test Certificates.

Summary:

TGL's Fabrications in conjunction with Freight Care's ASIA ENVI Services Co; Ltd are working hard building a reputation as one of the top service provider in oilfield equipment through customizing our inventory & meeting the specific challenges faced by our customers today. With our headquarters in Sattahip on the Eastern Seaboard of Thailand & Satellite Office in Ranong enabling us to serve the whole of Thailand, Malaysia, Myanmar, Laos & Cambodia where we have earned our recognition by serving our clients ongoing daily project needs.

We can & will be there to help keep your job moving ahead.

Wouldn't your "accounts office" be happy to deal with one billing only per month for all the above services?

Sure they would; please contact us for further details of how we can help you with all the profile items in this booklet or more. We look forward to assisting you in your daily needs; we are on call 24-7 so please look us up anytime. All contacts on front page of this Profile.

NOTE:

Some rentals maybe limited to availability at the time of your inquiry!

Remember; We can fabricate more units for "you the client at any time" but please; a lead time for this must be adopted.
